

Adapt Your Workflow, Your Way

At Quantabio, we understand that one size doesn't fit all. That's why we offer solutions that are adapted to meet your specific research and production needs. Whether you're looking for a complete product or simply a component in a molecular workflow with optimized fill volumes, custom packaging configurations, or unique reagent formulations, our team is here to bring your vision to life.

Ready to easy customize?

Step 1

Discuss requirements with
our team of experts

Step 2

Test initial formulations or
packaging solutions

Step 3

Scalable manufacturing to
meet your timeline and budget

Customization Options

Basic

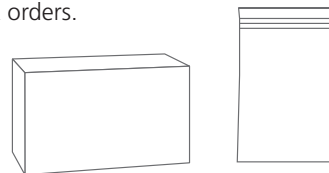

Package sizes

We can accommodate a range of volume and reaction needs from microliters to liters.

Packaging configurations

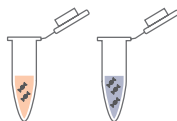

A variety of formats to fit your workflow needs from compact and convenient to bundled kits or bulk orders.

Advanced

Custom Formulations

Optimize your performance with our tailored reagent options: Proprietary enzyme mixes, buffers and master mixes. Custom concentrations or loading dye components.

Key Capabilities

- Enzyme production & QC
- Buffer formulation & optimization
- Aliquoting, labeling, packaging
- License free royalties on OEM products
- Custom master mix formulations
- Assay optimization
- Application development
- Dependable delivery schedules

Company Highlights

- Founded in 2001
- Headquartered in Beverly, MA, USA
- Production sites: Beverly, MA & Frederick, MD.
- ISO 9001:2015 certified by TÜV Rheinland
- Experts in cDNA synthesis, PCR, qPCR and NGS
- Referenced in +16,000 publications
- Innovator of inhibitor tolerance (ToughMix)
- Sustainable lyophilized products (eQo products)
